

Building agents for real-world challenges

AI that doesn't just
provide answers—it
helps you take action.

About Fivetran

Fivetran is the data foundation for AI. The Fivetran platform moves, manages, and transforms data from every system a business runs on into a secure, reliable foundation engineered to evolve, with the flexibility to work across clouds, engines, and tools. With Fivetran, analytics, operations, and AI run on data you trust and control. Leading organizations like LVMH, Pfizer, Verizon, and OpenAI rely on Fivetran to turn data into a competitive advantage. Learn more at [Fivetran.com](https://fivetran.com).

Resources

Please create a Fivetran 14 days free trial to get access to Fivetran - <https://fivetran.com/signup>

There are two options for integrating your agents with the Fivetran platform - choose the one that works best for your use case and development style:

Option 1 - MCP: Fivetran provides an example Open Source MCP Server you can download and set up to provide your agent with access to your Fivetran account - <https://github.com/fivetran/fivetran-mcp>. You may wish to fork this and to extend it as needed for your use case.

Option 2 - REST API: As an alternative you may want to use the Fivetran REST APIs as your integration mechanism - you'll find the documentation here: <https://fivetran.com/docs/rest-api> and an example project here: https://github.com/fivetran/api_framework

To use either option you'll need a Fivetran API key - see the instruction here (the same key can be used for both REST and MCP) - <https://fivetran.com/docs/rest-api/getting-started#authentication>

For more information about connecting Fivetran with BigQuery as a destination see our quickstart - <https://fivetran.com/docs/destinations/bigquery/setup-guide>
