

Building agents for real-world challenges

AI that doesn't just
provide answers—it
helps you take action.

About GitLab

GitLab is a complete DevSecOps platform, delivered as a single application, that fundamentally changes how Development, Security, and Operations teams collaborate to build software. From idea to production, GitLab helps teams improve cycle time from weeks to minutes, reduce development costs and time to market, and increase developer productivity.

Resources

A 30-day Ultimate trial covers everything participants need. No access codes required. Each trial includes Duo Agent Platform with 24 credits per user. Custom agents (GA), custom flows (Beta), AI Catalog (GA), and the MCP server (Beta) are all available.

- Get Started: https://docs.gitlab.com/user/get_started/get_started_agent_platform/
- Custom Agents: https://docs.gitlab.com/user/duo_agent_platform/agents/custom/
- Custom flows: https://docs.gitlab.com/user/duo_agent_platform/flows/custom/
- AI Catalog: https://docs.gitlab.com/user/duo_agent_platform/ai_catalog/
- MCP Server: https://docs.gitlab.com/user/gitlab_duo/model_context_protocol/mcp_server/
- Start a Trial: <https://about.gitlab.com/free-trial/>

Please Note: Participants using external tools to call GitLab via MCP need to set a default Duo namespace. The MCP server doc above covers this. In-GitLab usage works without it.
